A. Table of Contents

CLARRIFICATIONS

3.01 Unit price One refers to a keyed renovation note on sheets A2.1, A2.2, A2.3 and A2.4. This note is keyed to the plan where areas of water damaged interior flat plaster has been identified on the inside face of the exterior walls and on some plaster finished interior partitions. At these locations the plaster may or may not be keyed to the substrate. If not the plaster is to be removed and new plaster is to be installed. If the plaster is keyed to the wall then the plaster is to be repaired as needed and prepped for new painted finish. The contractor is to assume that 5000 sq. ft. of plaster isn't keyed to the wall and is to be removed and replaced with new plaster and should be included in the base bid. The unit price should provide for additional areas discovered as work progresses. The contractor must assume that there will be some prep work associated with the removal of vinyl wall coverings and preparation of the walls for new finishes.

3.02 This will be the last addendum issued on the project.
